Cross+Search Plus

The Accurate Choice For Research & Marketing

Cross+Search Plus is a CD-ROM electronic version of the Hill-Donnelly Directory designed for use with the popular Windows operating system and ideally suited for targeted research and marketing projects.

For Research Projects . . .

Search For Listings

Cross+Search Plus provides lightning-fast electronic searches by name, address or telephone number. With any search, you may enter partial information to retrieve your listings.

Display Nearby Listings

After your target listing has been located, a single mouse click will display the closest neighbors. By scrolling up and down the screen, entire streets may be reviewed from beginning to end.

Print Your Search Results

Once your search results are visible on the screen, you can quickly send the information to your printer.

Information Content

Cross+Search Plus is much more than a white page telephone book on CD-ROM. We've combined detailed information from the local telephone company, Public Records, US Bureau of Census, Direct Marketing Association and the US Postal Service to create the most comprehensive resource ever assembled on area consumers and businesses. It's the perfect tool to help you deliver BIG results, even on a tight budget and with limited time...

For Marketing Projects . . .

Custom Search

This powerful feature lets you mix and match targeting attributes to pinpoint your top prospects by:

- ▶ Area
- ▶ Listing Type
- ▶ Estimated Household Income
- ▶ Median Home Value
- ▶ First Year at Address
- ▶ Neighborhood Demographics

Outputs

Up to 1,000 target listings may be tagged per session and sent to **mailing labels**, **telemarketing lists** or **ASCII files**. Target listings may be tagged individually or a screen at a time (the screen holds up to 16 target listings).

An optional Express upgrade is also available for higher volume direct marketing.

Auto Dial Feature

Reaching your top prospects via the telephone has never been easier. After your target listing has been located, a single mouse click routes the telephone number to your PC's modem for dialing.

Attractive package rates are available for multiple territories on a single CD-ROM and Network versions of this program. Please contact a Hill-Donnelly representative for additional information.

Use Your Directory To...

✓ **Increase Sales**

Choose any neighborhoods or streets you wish. Wherever your best prospects are located, your directory can help you target and reach them. Use the Location Section to help pinpoint the new listings or focus your efforts on the established ones. Whether you prefer direct mail, telemarketing, or personal canvassing, it's a cost-effective way to reach your top prospects.

✓ **Improve Credit Collections**

Before accepting checks from questionable accounts, use your directory to verify name, address and phone number information. On returned checks that only show an address, use the Location Section to reference the proper phone number. For unpaid accounts that have moved without leaving a forwarding address, contact former neighbors to help "skip trace" them.

✓ **Research Market Areas**

Use the Location Section to determine the characteristics of a neighborhood. Is it mostly residential or businesses? Single Family or Multi Family? Are there a lot of newcomers? Who are the tenants at a given address? What is the relative affluence compared to other neighborhoods in the area? The Location Section is also valuable for calculating market penetration.

✓ **Investigate Leads and Messages**

Often lead sources contain only an address or a phone number. Before responding, use your directory to identify the prospect. Knowing who that "mystery" phone number belongs to can help you prepare yourself beforehand. When used with Caller ID, our Numeric Section is a great way to maximize your information.

✓ **Simplify Delivery and Service Calls**

Use your directory to "double-check" and verify those hard to read names and addresses. Often a shipping slip or service call request will contain only a partial name and a street address. It's easy to look up the correct phone number using the Location Section. A quick phone call to the customer can ensure they'll be expecting you.

✓ **Update Customer Files**

Effective customer service requires keeping address and phone number information up to date. At a glance, your directory can show you whether this information on a customer is still valid. Use the "Street Finder" to ensure your street name spellings match up with US Postal Service specifications. This is an important consideration when sending out mail. Have you ever encountered transposed numbers in an address or telephone number? Your directory can help you track down the proper information.

5 Tips For More Successful...

Direct Mail

Be consistent- It may take several mailings to a prospect to establish a level of familiarity and confidence in your offering.

Stress Benefits- Let your prospects know what your product/service will do for them. Don't spend all your time emphasizing the features. Usually, it's the benefits that are most important.

Make the copy easy to understand- Tailor your copy to the intended target audience. Avoid technical jargon, which may not be clearly understood.

Experiment- Try different approaches that emphasize a variety of features, advantages and benefits. Don't stay with the same piece solely because it's what you've always used.

Track your results- If possible; keep a log of the response rates for all your mailings. It's only by knowing what's worked well and what hasn't that you'll improve the odds of success.

Telesales

Be enthusiastic- If you're not upbeat about your product/service, chances are your prospect won't be either.

Listed for feedback- Often your prospect will guide you towards their "key" buying needs. Adjust your presentation to emphasize these points.

Prepare for objections beforehand- Most objections fall into a few general categories. Figure out in advance the best way to turn these objections into selling points.

Write down important selling points- Having a "script" by the phone is an easy way to make sure your presentation flows smoothly and covers the major benefits.

Remember to close- Don't be afraid to ask for the order. It may be helpful to have several different choices written down.

Credit Collections

Do your homework beforehand- Make sure credit applications are filled out completely. Remember to verify all information and keep your customer files up to date.

Make sure credit terms are clearly understood- Your credit application and invoices should emphasize the required payment terms.

Create a collection schedule- Once an invoice moves into the "past-due" category, don't delay. Being prompt is crucial in keeping overdue invoices from becoming "bad debts".

Flag "problem" customers- Pay special attention to "slow-payers" and be cautious in granting them credit raises. Highlight any problems relating to invoices in their customer files.

Use neighbors to help "skip trace"- If a delinquent account has moved, try contacting former neighbors. Often they can point you towards a new address.
